

# COMP 1270 Assignment 1

**DUE: No later than 11:59 PM, Friday, February 14, 2014**

## Objectives:

- ~~• Create a Google account. →~~
- ~~• Create a Weebly account. →~~
- Create a website framework using the Weebly CMS platforms utilizing content from the public domain.
- Utilize numerous Weebly elements.
- Create a QR code.

**Note:** We will be discussing many of the assignment details in class.

## Tasks:

- ~~1. Create a Google account with the userid "COMP1270yourLastName". Append an integer if necessary. →~~
- ~~2. Create an account on <http://www.weebly.com>. You must supply an email address as the userid for this account. Use the Gmail address that resulted from the creation of your Google account above. →~~
3. Create a website similar to <http://comp1270.info>. Use a template that you find pleasing. Do not concern yourself at this point with specific content other than what is outlined below. It is your task to simply get used to how to manage this CMS. Use only images and content from the public domain.
  - a. Your website should use the subdomain COMP1270yourLastNamexxx.com.
  - b. You should have six pages: A Home page, a Photo Gallery page, a Documents page, a Videos page, a QR page, and a Contact Form page.
    - i. The Home page must contain at least one image and text.
    - ii. The Photo Gallery page must contain at least six images.
    - iii. The Documents page must contain at least three public domain documents for download.
    - iv. The Videos page must have an embedded YouTube video and an embedded TED video.
    - v. Your QR page will contain a QR code that contains the URL to the web site itself.
    - vi. The Contact Form page can use the Weebly default Contact Form.
  - c. Additionally, create one more page that takes advantage of at least one additional Weebly element.
  - d. Do not nest pages at this time.
4. Submit the URL to your websites you have created via D2I Dropbox.
